EvoSteam

Effiziente Stapelfaser-Produktion:

- **Energie-Einsparung:** bis zu 8 %
- **Wasser-Einsparung:** 8 %
- **Abfallreduktion:** 50 %
- **Leerlaufleistung:** -20 %

bluesign®
VERIFIED DATA

bluesign® VERIFIED DATA includes the verification of impact data reported by Oerlikon Neumag (water, spin preparations, thermal energy and electricity, CO₂) via plausibility check of supporting records for the scope: staple fiber process Oerlikon Neumag EvoSteam (draw line excluding associated activities). Data reported by Oerlikon Neumag is rated in accordance with defined methodology 2,1 – fair, meaning partly based on assumptions and/or secondary data from similar technology (sample line).
